C2PC as described in this filing. Output power listed is conducted. This Module is limited, requiring the host integrator to file a Class II permissive change for each specific host per the test plan defined in the module integration instructions. Co-location of this module with other transmitters that operate simultaneously are required to be evaluated using the FCC multi-transmitter procedures. The installers must be provided with antenna installation instructions and transmitter operating conditions for satisfying RF exposure compliance. The host integrator must follow the integration instructions provided by the module manufacturer and ensure that the composite-system end product complies with the FCC requirements by a technical assessment or evaluation to the FCC rules and to KDB Publication 996369.
